Acknowledgment

The Food, Medicine and Healthcare Administration and Control Authority of Ethiopia (EFMHACA) would like to extend its gratitude to the World Health Organization (WHO) for its technical assistance, meeting all financial expenses associated with consultative workshops and printing of the List of Medicines for Community pharmacy. The Authority would like to give special acknowledgement to the National Drug Advisory Committee and all participants of the consultative workshops for their invaluable contributions in scrutinizing and finalizing this list. Last but not least, the Authority would also like to thank Management Sciences for Health/Strengthening Pharmaceutical Systems (MSH/SPS) for its technical support in revising this list.

FORWARD

Pharmacotherapy has always been an integral part of health care system and will remain so in the future. This relies on the availability of safe, effective and affordable medicines with the required quality, in reasonable amount. Moreover, on the rational prescribing, dispensing and use of such medicines. Ethiopian drug policy ensures that medicines which are required for prevention, diagnosis, treatment, mitigation and rehabilitation of diseases affecting the majority of Ethiopian people have to be identified and classified to respective levels of health service delivery.

The list of community pharmacy is revised in light of the above principle and also on the basis of the latest development in the field of Medicine and Pharmacy. Categorization of the list was done after considering important factors such as functions/services diagnostic facilities, level of training of health personnel and other drug related factors. Guided with this principle, this list is prepared in consolation.

The presentation of the list alone does not solve country's problem in distribution, dispensing and use of drugs unless all the concerned bodies commit themselves to its full implementation. Therefore, all concerned professionals and organization are requested for distribution and dispensing of all drugs included in this list at the level of Community pharmacy.

Since the process of revising community pharmacy list of Medicines is a continuous process which takes into accounts change priorities for public health action, epidemiological conditions as well as progress in pharmacological and pharmaceutical findings, this list will be subjected to conitinous revision. Consequently all users of this list are strongly invited to send their comments and suggestions to the Food, Medicine and Health care Administration and Control Authority of Ethiopia, P.O.box 5681, Tel-251-11 552 41 22 e-mail fmhaca@ethionet.et Addis Ababa Ethiopia.
